DETAILED ACTION

Allowable Subject Matter

Claims 3-9, 11-16 are allowed.

Claims 3-9, 11-16 are allowable over the prior art of record for at least the reason that, even though the prior art discloses optical components wherein a coating extends over a substrate and at least beyond the substrate onto a base unit supporting the substrate, the prior art fails to teach or reasonably suggest, regarding claims 3, 6/3, 7/3, 8/3, an optical component wherein the substrate region deviates from an orientation that is selectable relative to the reference by not more than 0.25 degrees, regarding claims 4, 5/4, 6/4, 7/4, 8/4, an optical component wherein all surfaces comprising the reference are parallel to one another and to the substrate region within an angular tolerance of 0.15 degrees, and regarding claims 9, 11-16, a method for fabricating an optical component, wherein an assembly device is used that contains a support plate being brought into contact with the substrate, and having a counterpart for a reference of the base unit brought into contact with the reference, with the support plate and the counterpart remaining in a rigid position relative to each other at least during the step of assembling the substrate, while the substrate and the reference are positioned with respect to each other in a manner predefined by the assembly device, as set forth by the claimed combination.
